

How to stay sales-ready in slower months

Your checklist for staying active and effective when things go quiet

Even in slower months, outreach shouldn't grind to a halt. Pipeline momentum is built over time, not overnight. What you do now sets the tone for the next quarter. Use this checklist to stay visible, productive, and ready to capitalise when the market picks up.

Set your focus

-  Adjust targets: aim for engagement, learning, and future opportunities
-  Don't chase cold leads just to fill a gap

Use your data

-  Revisit recent activity - who clicked, replied, visited?
-  Prioritise warm leads and re-engagement
-  Keep tracking buyer intent

Stay responsive

-  Check autoresponders and inbox coverage
-  Follow up on out-of-office replies
-  Be ready to reply quickly

Improve your approach

-  Test new messages, channels, segments, or CTAs
-  Revisit your ICPs and data filters
-  Review campaign timing and cadences

Nurture and score

-  Build or refine your lead scoring system
-  Send useful, low-pressure follow-ups to warm leads

Sharpen your sales toolkit

- Refresh case studies and sales collateral
- Create or improve objection-handling content

Build your brand

- Ask for reviews, testimonials, or referrals
- Share recent wins and client stories

Work your client base

- Reconnect with existing customers
- Look for upsell and cross-sell opportunities

Sopro is a personalised, multi-channel outreach service that brings leads straight to your sales team. Backed by 300 experts, real-time data, and advanced outreach tech.

- Fully-managed outreach across multiple touchpoints
- Intent-triggered engagement at the perfect moment
